#### METHODOLOGY

The Grinnell College National Poll, conducted March 27-30, 2020, for Grinnell College by Selzer & Co. of Des Moines, IA, is based on telephone interviews with 1,009 U.S. adults ages 18 or older, including 777 likely voters in the 2020 general election.

Interviewers with Dynata contacted households with randomly selected landline and cell phone numbers. Interviews were administered in English. Responses were adjusted by sex, age, race, and educational attainment to reflect the general population based on recent census data.

Percentages based on the full probability sample of 1,009 respondents may have a maximum margin of error of plus or minus 3.1 percentage points. This means that if this survey were repeated using the same questions and the same methodology, 19 times out of 20, the findings would not vary from the true population value by more than plus or minus 3.1 percentage points. Results based on smaller samples of respondents—such as by gender or age—have a larger margin of error. Results based on the 777 likely voters in the 2020 general election have a maximum margin of error of plus or minus 3.5 percentage points.

Republishing the Grinnell College National Poll without credit to Grinnell College is prohibited.
